About

I have a background in computer engineering with a focus on mobile application and website development. I am the type of person who takes advantage of every opportunity to learn something new. That is why I enjoy challenges. As a result, I feel pressure to gain a lot of new experiences.

Education

2022 - Now

- **Informatics Engineering ,Universitas Komputer Indonesia**

Studying at Universitas Komputer Indonesia majoring in Informatics Engineering

2017 - 2020

- **Vocational School**

Studied Bandung 4 State Vocational High School

Experience

• **MaestroByte Solution**

Freelance | Mobile Developer | August 2022 - September 2022

In August 2022, I was offered a freelance position by a friend who used to work at CyberLabs to develop a mobile application at MaestroByte Solution, which I accepted. During my freelance work, I was part of a team of 4 people.

• **Deact**

Freelance | Back End Web Development | July 2021 - August 2021

In July 2021, I obtained a freelance position as a back-end web developer at a company called Deact. I worked on a team of 3 people.

• **CyberLabs**

Full Time | Full Stack Developer | June 2020 - June 2021

After completing my internship, I was recruited by CyberLabs based on my performance during the internship. While there, I worked as a Full Stack Developer on a team of 4, including myself.

• **CyberLabs**

Internship | October 2019 - December 2019

During my vocational high school, I completed a 3-month internship at CyberLabs where I received training in Laravel and Javascript Jquery and learned to create an e-commerce website.
