Skills

- Mobile : Flutter, Dart, Bloc, Cubit, Clean Architecture
- AI & Machine Learning : Python, Pytorch, Faster R-CNN, YOLO
- Backend : Laravel, Node JS (Express), FastAPI, REST API
- Database & Tools : MySQL, MongoDB, Firebase, Git

Language

- Bahasa Indonesia
- English

Hobbies & Interest

- Code
- Game
- Manga

About

Mobile Developer with a background in Informatics Engineering and a genuine interest in where AI meets mobile. I build Flutter applications with Clean Architecture and Bloc/Cubit, and enjoy pushing beyond standard app development, including integrating computer vision and LLMs directly into Flutter to automate complex real-world workflows. I work well in cross functional teams and have contributed across mobile, backend, and web in both startup and freelance settings.

Education

2021 - 2025

- **Informatics Engineering , Universitas Komputer Indonesia**
 - Thesis : Automatic Translation Application for Japanese Comics(Manga)
 - Implemented Faster R-CNN for precise element detection(Frame, text, text effect) and MangaOCR for Japanese character recognition
 - Leveraged GPT-4.1 for context aware translation to maintain narrative flow and accuracy
 - Developed an end-to-end mobile solution using Flutter to automate the manga translation process.
 - Processed full manga pages end-to-end in 5-10 seconds per page, covering detection, translation and mobile rendering

2017 - 2020

- **Vocational School**
Studied Bandung 4 State Vocational High School

Experience

- **Wit Indonesia**
Internship | Mobile Developer | August 2024 - November 2024
 - Developed an internal HR mobile application with attendance check-in/out feature using GPS validation
 - Collaborated with UI/UX design team to create responsive interface
 - Ensured smooth data flow between Flutter app and backend team
 - Integrated features with REST API
 - Deployed core features to HR and project management teams
- **Hacktiv8**
Independent Study | AI & Cybersecurity | February 2024 - June 2024
 - Built and implemented ML mini-projects using Python, covering classification models and core AI concepts
 - Collaborated on AI-focused tasks while applying secure coding principles and network security basics
- **MaestroByte Solution**
Freelance | Mobile Developer | August 2022 - September 2022
 - Developed an Internal mobile application for food & beverage business
 - Implemented UI screens using Flutter
 - Integrated REST API for operational processes
 - Worked with a team of four to deliver features under short deadlines
- **CyberLabs**
Full Time | Full Stack Developer | June 2020 - June 2021
 - Developed multiple web and mobile applications for internal and client needs
 - Built backend features using Laravel (PHP), REST API, and MySQL
 - Assisted the frontend team in implementing UI components using jQuery
 - Contributed to mobile app modules using Flutter
 - Debugged and optimized features across web and mobile platforms
 - Collaborated with a 4-person development team to deliver production-ready features
