

Hasin Bashari Panansah

Bandung, Indonesia | (+62) 81320518412 | hasinbasharip@gmail.com | <https://gladiuzz.github.io/Portfolio/>

Mobile Developer with a background in Informatics Engineering and nearly 2 years of experience across full-time, contract, internship, and freelance roles. I build Flutter applications with Clean Architecture and Bloc/Cubit, and specialize in integrating computer vision and LLMs into mobile workflows. Experienced in cross-functional teams across mobile, backend, and web.

TECHNICAL SKILLS

- Mobile: Flutter, Dart, Bloc / Cubit, GetX, Clean Architecture
- AI/Machine Learning: Python, PyTorch, Faster R-CNN, TensorFlow, YOLO
- Backend: Node.js/Express, Laravel, FastAPI, Django
- Database: MySQL, MongoDB, Firebase
- Tools: Git, Github, Android Studio, Xcode, Figma, Postman

EXPERIENCE

Taiwan Mobile — *Software Engineer* — *Contract (Freelance)* August 2026 - Now

- Engaged as a Contracted Freelance Software Engineer for Taiwan Mobile (via Staffinc), collaborating within a cross-border remote engineering team
- Project scope and technical details confidential under client NDA

Wit Indonesia — *Mobile Developer* — *Intern* August 2024 - November 2024

- Developed an internal HR mobile application using Flutter and Bloc, featuring GPS-based attendance check-in/out and leave request management
- Collaborated in a cross-functional team of 5, working alongside 2 backend developers, 1 UI/UX designer, and 1 project manager
- Integrated REST API to ensure smooth data flow between mobile app and backend services
- Implemented responsive UI based on designer specifications, maintaining consistency across screen sizes
- Delivered core features used internally by PM and HRD team within internship period

Hactiv8 — *AI & Cybersecurity Bootcamp* February 2024 - June 2024

- Built a sentiment analysis model using Python and TensorFlow to classify Twitter comments, achieving approximately 84% accuracy
- Explored core AI and machine learning concepts including data preprocessing, model training, and evaluation through hands-on mini-projects

MaestroByte Solution — *Mobile Developer* — *Freelance* August 2022 - September 2022

- Developed an internal inventory management mobile application for a food & beverage business using Flutter and GetX
- Implemented QR code scanning feature for product inventory tracking
- Integrated REST API for operational data management
- Collaborated in a team of four to deliver the application within a one-month deadline

Cyberlabs — *Full Stack Developer* — *Full Time* June 2020 - June 2021

- Developed 5+ web and mobile applications (published on Google Play and App Store) for clients and internal use, including a marketplace app with real transactions and apps deployed at public events
- Built backend features using Laravel, REST API, and MySQL to support both web and mobile platforms
- Developed mobile app modules using Flutter, handling core features and API integration
- Debugged and optimized features across web and mobile to ensure production-ready quality
- Collaborated in a 4-person development team, contributing across mobile and backend throughout the full development cycle

EDUCATION

Indonesian Computer University — *Bachelor of Computer Science* — **GPA:3.39/4.00** September 2021 - August 2025

- **Thesis Project: Automatic Translation Application For Japanese Comics (Manga)**
Developed an end-to-end manga translation mobile application using Flutter, integrating Faster R-CNN for element detection, MangaOCR for Japanese character recognition, and GPT-4.1 for context-aware translation. Built the complete ML pipeline from scratch, including dataset collection, manual image labeling, and model training, before integrating into mobile. The complete pipeline processes a full manga page in 5-10 seconds, covering detection, OCR, translation, and mobile rendering.
- Undertook freelance and internship mobile development projects concurrently during studies

Vocational High School 4 Bandung — *Software Engineering* September 2017 - May 2020

- Majored in Software Engineering, building foundational knowledge in programming, software development, and application design.
